

February 24, 2011

To Whom It May Concern:

The active ingredients in all Novozymes Biologicals BioAg Group inoculants are naturally-occurring, beneficial microorganisms isolated from the soil. We do not manufacture or sell any inoculants that have been genetically modified.

Our peat-based inoculants use natural graphite as a sticker. We do not use corn based stickers in our peat-based inoculants.

We do however use a corn based ingredient in our TagTeam® and N-Prove® liquid inoculants which therefore could contain small amounts of genetically modified material derived from the corn. These liquid inoculants are the only BioAg inoculants to be sold in 2011 that will contain any type of corn based ingredient.

If you have any questions, you can reach me toll free at 1-888-744-5662 or check out our website at [www.bioag.novozymes.com](http://www.bioag.novozymes.com).

Yours truly,

Bonnie Willie
